Crisp Food Technologies® Containers

Keeps Fried Foods Hot & Crispy for 30-Minute Delivery

Maintains Food Texture and Temperature

Unique, patented, convection cross-flow design relieves moisture and condensation while maintaining food temperature. Through-the-closure ventilation and raised airflow channels in the bottom of the container, combine with venting in the lid to ensure fried foods remain crisp.

In Use at
Over 12,000 Locations

Independent studies by leading retailers and restaurant chains demonstrate that the temperature and texture of fried foods are preserved longer than in other materials during 30-minute delivery.

Ideal for burgers and fries, chicken wings, fried chicken and more!

Add soups, salads, and side dishes to Crisp Food Technologies® Containers to hear the sounds of a successful delivery experience!

Crisp Food Technologies® Containers

Fried foods retain their crunch

French fries hot & crispy

Nature's Best 

BENEFITS

Maintains food texture and temperature for home delivery

Fried foods remain crispy for 30-minute delivery

Hot food remains hot for 30-minute delivery

Perfect for fried foods: chicken, fish, wings, fries, and more

Reduces order errors before food leaves the restaurant

Food remains fresh & appealing for the just-made look

Highlights food presentation; durable, cut-resistant surface

Withstands temperatures to 230°F; heat lamps, warming units, microwave

Eliminates messy spills; lid remains closed during handling and transit

Consumer reusable and eligible for recycling curbside

Bases made with 40% less polypropylene resin

Consumers want the same taste experience at home as they have in the restaurant!
