Subject: Ozone Depletion Compliance: Polyvinyl Chloride Film (PVC)

Date: January 4, 2023

This letter is in response to your request that Anchor Packaging provide you with EPA Ozone Depleting Substances information for Anchor Packaging PVC Films.

We can certify that, to the best of our knowledge, no Class I or Class II Ozone Depleting Substances, such as "chlorofluorocarbons (CFCs), halons, carbon tetrachloride, or methyl chloroform," are used in the manufacture of Anchor Packaging PVC Films.

This specification compliance is for the finished product, provided it is unmodified and used in accordance with recommended applications by the consumer. Anchor Packaging is a processor of PVC and induces no changes that would affect compliance with the indicated regulations.

Anchor relies on good faith with its suppliers and guarantees compliance of the products as described above up to the time the products are shipped. Thereafter, it is the responsibility of the customer to assure that all applicable conditions and specifications outlined under the above-mentioned regulatory categories are maintained.
