Culinary Tamper-Safe™

Nature's Best® Natural

WHAT DOES YOUR PACKAGING SAY ABOUT YOUR FOOD?

Six High-Performance Lines for Delivery, Pick-up, and Takeout

The Culinary Series line offers a range of shapes, sizes, hinged one-piece or separate bases and lids made with polypropylene to withstand temperatures to 230°F with heat lamps, warming units, and microwaves. These containers are strong, durable, and cut-resistant with excellent structural integrity to maintain the food presentation.

Sustainable Solutions in Packaging

ANCHOR PACKAGING MANUFACTURES RIGID PACKAGING TO PROTECT FOOD-TO-GO, AND FOLLOWS THE EPA RECOMMENDATIONS FOR SOLID WASTE MANAGEMENT.

For over 50 years, Anchor Packaging has manufactured innovative consumer packaging solutions with performance characteristics that maintain food quality for delivery, display and takeout. We continue to expand our knowledge, designs, technology and operational base to create and deliver the answers to tomorrow's packaging challenges.

Anchor Packaging offers environmentally neutral products produced in a sustainable manufacturing environment. Anchor recycles virtually 100% of its raw materials and continues to optimize our product designs in order to reduce fuel costs and waste.

REDUCE:

Our product development team has greatly reduced the use of petroleum-based resins in our products through design, process and material engineering without sacrificing performance. Our polypropylene (PP) Culinary Squares® bases and Nature's Best® Natural Hinged use 40% less oil-based resin with natural mineral filled additives. The Culinary Lites® hinged containers utilize lighter weight material without sacrificing performance.

REUSE:

Anchor Packaging was the first to introduce "REUSE, then recycle" with our polypropylene takeout packaging. Our product designs provide sturdy, rigid packages that are dishwasher-safe for multiple uses. The EPA continues to recommend REUSE over many other waste management strategies.

RECYCLE:

Anchor's rigid polypropylene clear lids, hinged containers and mineral-filled bases are eligible for recycling curbside in most communities. Check for local recycling information at www.earth911.org.

RECOVER (STORED ENERGY):

Anchor polypropylene products, when safely incinerated in a waste-to-energy facility, produce the highest per ton BTU energy value of any waste material: 38 million BTUs per ton. This is twice the energy value of coal, the primary source of electric power generation in the U.S.

Made in USA
PFAS-Free and BPA-Free
Kosher Approved
