

Crisp Food Technologies® CF690F

Hinged Container 9" x 6" 35 oz One Compartment Black Base/One Compartment Clear Anti-Fog Vented Lid

Description

The Crisp Food Technologies® Containers uses an exclusive, convection cross-flow technology design to relieve moisture and condensation, while maintaining product temperature. Through-the-closure ventilation, along with raised airflow channels in the base of the container, combined with venting in the anti-fog lid, ensure that fried foods remain crispy. The unique design of this packaging system retains internal temperatures better than the market-leading rigid container currently in use for fried foods. And, like all Culinary Series packages, it is designed to withstand up to 230°F when placed in warming unit displays, under heat lamps, and in the microwave.

Independent, side-by-side tests at several leading retailers demonstrated that the Crisp Food Technologies® Containers outperformed the leading fried chicken container: Better texture, better temperature retention, better tasting fried foods. The package holds up to 4 large pieces of chicken, as well a variety of other fried food items. It is made of polypropylene (#5PP), and is microwave-safe, dishwasher-safe, and consumer reusable and recyclable.
